Git: executed branch and merge example

Assistant-run demonstration in an isolated Linux environment. Not a capture of the student l
aptop.

```
$ git init -b main
Initialized empty Git repository in /workspace/scratch/tw-evidence-repo/.git/

$ git config user.name "TW Demonstration"

$ git config user.email "demo@example.invalid"

$ git status --short
?? README.md

$ git add README.md

$ git commit -m "Add practice README"
[main (root-commit) 9a72a81] Add practice README
 1 file changed, 1 insertion(+)
 create mode 100644 README.md

$ git switch -c feature
Switched to a new branch 'feature'

$ git add note.txt

$ git commit -m "Add feature note"
[feature 39b5876] Add feature note
 1 file changed, 1 insertion(+)
 create mode 100644 note.txt

$ git switch main
Switched to branch 'main'

$ git merge feature
Updating 9a72a81..39b5876
Fast-forward
 note.txt | 1 +
 1 file changed, 1 insertion(+)
 create mode 100644 note.txt

$ git log --oneline --all --graph
* 39b5876 Add feature note
* 9a72a81 Add practice README

$ git status
On branch main
nothing to commit, working tree clean
